DETAILED ACTION

Drawings

1. The replacement drawing sheet was received on June 16, 2006. The drawing sheet is acceptable for overcoming the objections to the drawings specified in paragraphs 1 and 2 of the office action mailed February 22, 2006. However, upon further review, and in view of the amendments to the claims filed June 16, 2006, the drawings are objected to for the reasons set forth below under paragraphs 4 and 5 of this action.

Response to Arguments

2. Applicant's arguments, see page 5, line 19 through page 9, line 21 of the Remarks section of the response filed June 16, 2006, with respect to rejection of claims 1-6 under 35 U.S.C. 103(a), and in view of the amendments to claim 1 filed therewith, have been fully considered and are persuasive. The rejection of claims 1-6 has been withdrawn.

Ex parte Quayle

3. This application is in condition for allowance except for the following formal matters:

DRAWING OBJECTIONS

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the following features must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. NOTE: The

Art Unit: 3752

following listed features are merely a few examples of what is not clearly shown in the drawing figures. Applicant should review the claims and drawings in their entirety for compliance with 37 CFR 1.83(a). It is also noted that most of the features that are not clearly shown are due to the fact that an assembled view of the entire device in cross-section has not been made of record. Providing such a view would likely overcome these objections.

- The piston being slidable within the hydraulic chamber must be shown.
- The upper seat for the piston within the hydraulic chamber of the upper valve body must be shown.
- A vehicle's hydraulic fluid system connected to the hydraulic chamber through the piston port must be shown.

5. The drawings are further objected to because the diaphragm seating member assembly shown in Figure 1 does not include any reference numbers (Note that the exploded view of this assembly in Figure 3 is generally denoted by reference number "16". Therefore, Figure 1 should include, at least, reference number "16" corresponding to the assembly).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must

Art Unit: 3752

be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

6. Claims 1-6 are allowed.

Conclusion

7. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
